

SIMCommander AntiVirus Analyzer

Nowadays, most of computers have Antivirus applications installed. However those AntiVirus applications only have limited functions and features on “Reporting” and “Proactive Alerting” areas. That’s why users still have the following concerns:

- Why computers infected by viruses again and again?
- How to protect against new virus?
- How many computers are using outdated AntiVirus client version or virus pattern?
- Which computer first infected by virus?
- How to discover other computers infected by the same virus?
- How can I take action proactively?
- Missing real-time AntiVirus information for analysis.
- Missing meaningful and actionable reports.

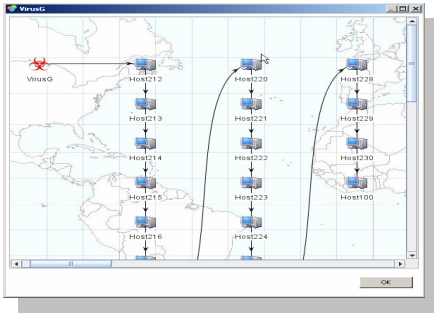

SIMCommander AntiVirus Analyzer

SIMCommander AntiVirus Analyzer is an easy-of-use AntiVirus reporting and analysis software that enhances AntiVirus application in reporting & proactive alerting capabilities plus turns AntiVirus events/logs into “Actionable and Meaningful” information.

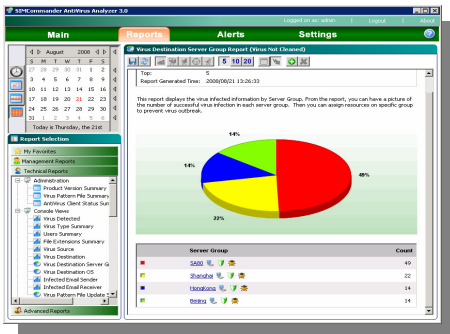

BENEFITS

- Automatic visualize and report virus activities in your network
- Monitor antivirus client version and virus pattern proactively
- Proactively notify user in real-time when abnormal situation occurred
- Easily identify the first computer infected by the virus and the infection path with the same virus
- Rich report types and actionable reports that enable you to take immediate actions
- Compliance reports helps to address the complex demands of compliance standards into a single solution
- Advanced Reports include historical data comparison for easy to forecast the trends and make decision
- Generate and customize reports with just a single click
- Enhance the value of AntiVirus applications
- Out-of-box ready for Managed Security Service (MSS)

Virus Infection Path

Interactive Reporting

Rich Report Types

Number	Alert Name	Alert Time	Event Reason	Destination	Event Information	Alert Notification
16,985	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0209	Wuol_MW02_Wuol-A	On Screen
16,984	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0208	Wuol_MW02_Wuol-D	On Screen
16,983	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0207	Wuol_MW02_Wuol-C	On Screen
16,982	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0206	Wuol_MW02_Wuol-B	On Screen
16,981	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0205	Wuol_MW02_Wuol-E	On Screen
16,980	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0204	Wuol_MW02_Wuol-F	On Screen
16,979	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0203	Wuol_MW02_Wuol-AC	On Screen
16,978	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0202	Wuol_MW02_Wuol-I	On Screen
16,977	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0201	Wuol_MW02_Wuol-H	On Screen
16,976	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0200	Wuol_MW02_Wuol-G	On Screen
16,975	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0209	Wuol_MW02_Wuol-F	On Screen
16,974	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0208	Wuol_MW02_Wuol-E	On Screen
16,973	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0207	Wuol_MW02_Wuol-D	On Screen
16,972	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0206	Wuol_MW02_Wuol-C	On Screen
16,971	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0205	Wuol_MW02_Wuol-B	On Screen
16,970	virus not detected	2008/08/20 14:26:30	Virus cannot be cleaned	Host0204	Wuol_MW02_Wuol-A	On Screen

Proactive Alerting

Enhance AntiVirus Activities Monitoring

- A Single Console contains all "Important" and "Relevant" virus activities with Drill-down capabilities and helps to easily and proactively monitor AntiVirus client version and virus pattern to keep the AntiVirus protection up-to-date to defense new viruses

Identify Virus Infection Path

- Automatic reveal which computer is the first computer infected by virus and discover other infected computers by the same virus easily

Proactive Prevention

- Proactively notify users in real-time when there is abnormal situation occurred. E.g. virus outbreak, antivirus pattern is older than 7 days etc.

Comprehensive Reporting

- Out-of-the box comes with over 200 AntiVirus report templates including Top N Viruses, AntiVirus Client status, AntiVirus Pattern status and Compliance reports
- Compliance reports help you to meet with the compliance requirements by obtaining a complete picture of AntiVirus solutions
- Provides interactive 3D report chart and tabular reports
- Export capabilities to a variety of formats, such as PDF, RTF and HTML

Advanced Reporting

- Executive Report includes the risk formula for easy identify the risk level of the company
- Expert report includes the historical data comparison for management easy to forecast the trends and make decision
- Point of infection report for easy to trace the virus infection whether is from gateway or a specific computer

Actionable Reports

- Reports contain comprehensive descriptions, potential impacts and recommended resolutions that enable administrators to take immediate actions.

Powerful Drill Down Reports

- Provides detailed computer and viruses information to facilitate your troubleshooting when issues arise

Fast and Easy Report Generation

- One click to change report parameter, save and export reports. Simple and Easy!

SIMCommander MSSP Integration

- Helps MSSP efficiently to deploy and enable a profitable Managed AntiVirus Services

Support Multi-vendor AntiVirus Applications

- Symantec (Norton)
- Trend Micro
- Kaspersky

System Requirements:

- Intel P4 – 2GHz
- 512MB Ram
- 330GB Hard drive
- OS: MS Windows 2003 or XP Professional with latest SP
